SUMMARY

I learn like a scientist: observe, experiment, break, rebuild, improve. I engineer software, hack hardware, and architect solutions across the full stack. Naturally curious, I enjoy understanding how things work—whether it's technology, design, human behavior, or the hidden mechanics behind systems. My goal is to connect ideas across fields like UI/UX, AI, hardware, and software to create meaningful, innovative solutions.

EDUCATION

B.Sc. in Computer Science

Pursuing

Government College of Arts, Science & Commerce, Quepem, Goa

Focusing on Computer Science and Mathematics. Active participant in technical workshops and hackathons.

Higher Secondary School (HSSC) - Science Stream

Completed

Multipurpose Higher Secondary, Borda Margao

Core subjects: Physics, Chemistry, Biology, and Mathematics.

TECHNICAL SKILLS

Languages

HTML, CSS, JavaScript, Python, C, C++, Java

Frameworks & Cloud

React, Next.js, Node.js, Express, Kotlin, MongoDB, Firebase, SQLite

Hardware & IoT

Arduino / ESP32, Raspberry Pi, Circuit Design, Soldering

Design & Media

Figma / UI/UX, Photoshop, Premiere Pro, 3D Modeling

PROJECTS

Cyber Ranger

Community-Driven Cyber Awareness Initiative

Developed a platform for Goa empowering citizens to become cyber ambassadors. Implemented structured safety courses, real-time threat alerts, a secure password strength analyzer, and integrated a custom Botpress AI assistant to educate users against phishing, UPI fraud, and online scams.

Tech Stack: [HTML](#), [TailwindCSS](#), [JavaScript](#), [Firebase](#), [Botpress AI](#)

PlayMeet

Full-Stack Matchmaking & Event Management Platform

Bridged physical sports and competitive esports with a dual-ecosystem profile tracking platform. Engineered a unified global points economy, real-time WebSocket messaging, dynamic leaderboards, and automated tournament bracket generation.

Tech Stack: [MongoDB](#), [Express](#), [React](#), [Node.js](#), [Socket.io](#), [TailwindCSS](#), [Redis](#)

SnapSort

Native Android Utility App

Designed a high-performance app to resolve mobile storage bloat. Built recursive scanners for directories (DCIM/Downloads) to read chronological media metadata, performing file-system-level moves in milliseconds using Storage Access Framework (SAF) and DocumentsContract API.

Tech Stack: [Kotlin](#), [Jetpack Compose](#), [Coroutines](#), [SAF API](#), [Android SDK](#)

College Navigation Kiosk

Hardware & Software Integration (GCASQC Goa)

Created an interactive navigation and visitor check-in kiosk featuring a touch-screen professor directory and visitor check-in flow with Telegram alerts. Integrated an ESP32 microcontroller via a serial hardware bridge for physical proximity wake-up.

Tech Stack: [Python](#), [Flask](#), [SQLite](#), [HTML/CSS/JS](#), [IoT](#), [ESP32](#)

EXPERIENCE

Lenovo Leap WD Internship

2024

Lenovo

Completed the intensive Lenovo Leap WD Internship program, gaining hands-on experience and valuable insights into the corporate tech industry.

| WORKSHOPS & CERTIFICATIONS

- **Cyber Security & Ethical Hacking** - State-level workshop at SPES's Goa Multi-Faculty College (Mar 2026).
- **Drone Design and Electronics BootCamp** - C-DAC Bengaluru. Passed with 'C' grade (Oct 2025).
- **Cyber Crimes and Digital Hygiene Awareness Session** - Guest Speaker ("Cyber Yoddha") at Govt. College Quepem in association with Goa Police (2025).
- **Computational Chemistry & Drug Design (Winter School)** - Goa College of Pharmacy (Nov 2025).
- **Computational Linguistics Seminar** - Directorate of Higher Education, Govt. of Goa (Oct 2025).
- **Sentiment Analysis & Social Media Analytics** - National-level seminar at Rosary College of Commerce & Arts (Feb 2024).
